

KEY #513-UV EPOXY STIPPLE

Product Information Sheet

DESCRIPTION

KEY #513-UV Epoxy Stipple Coating is a 100% solids clear or pigmented epoxy coating specially formulated to create a stipple (orange peel) finish, with added resistance to ultra violet (UV) light exposure. **KEY #513-UV** provides a thixotropic abrasion resistant finish that better resists the normal ambering of epoxy finishes when exposed to indoor UV light spectrum and other intense lighting. **KEY #513-UV** is the ideal seal coat for any **Key Resin** system requiring a stipple (orange peel) finish.

KEY ADVANTAGES

- Excellent clarity and resistance to ambering
- Meets USGBC LEED criteria for low VOC
- Low odor for use in occupied areas
- Stipple (orange peel) finish
- Excellent sealer for cove base and wall coating systems
- Meets USDA standards for incidental food contact

KEY CONSIDERATIONS

- Must be applied at maximum thickness of 8 mils or less
- Minimum application temperature of 50°F
- Substrate must be free of curing agents and any foreign materials
- On or below grade installation must have an efficient vapor barrier under the slab
