

DON'T MISS...
Flowcrete Americas' **NEW**
AIA CES Lunch & Learn
Seminar!

INTRODUCING...
FLOWCRETE'S AIA CES
LUNCH & LEARN SEMINAR

Exploring the Cost of Floor
Failure in the Design
of Food & Beverage
Processing Plants

**BRAND
NEW!**

The new AIA CES Training Seminar from Flowcrete Americas is the ideal opportunity for architects to find out more about specifying fit-for-purpose flooring solutions for the food and beverage industry.

Failing to choose the right floor system can have a long list of unwanted effects for a food manufacturer, especially as a cracked, porous or failing finish can become a prime site for unsanitary bacteria buildup.

Flowcrete Americas has designed its new training seminar to ensure that architects are armed with the information they need to specify floors that can not only withstand the difficult conditions within food plants, but that can actively protect the surface from degradation.

WHAT DOES THE AIA CES SEMINAR INCLUDE?

This seminar will...

-  Explore the true cost associated with the incorrect specification of flooring in food environments
-  Identify common reasons for floor failure
-  Draw on real-life scenarios where a failing floor has resulted in financial or reputational damage
-  Outline key considerations to minimize floor failure risks
-  Identify flooring solutions that avoid floor failure risks

WHAT WILL I LEARN?

You will...

-  Understand the typical reasons for food & beverage floor failure
-  Analyze expense and upheaval associated with floor failure
-  Understand federal guidance, compliance and food safety management standards
-  Explore an appropriate specification framework
